Missionary Update

Water for Good: Water for Good is actively expanding safe water access across Central African Republic, Ethiopia, Tanzania, and Cambodia through new water systems, sanitation projects, and community health programs. In December 2025, over 1,000 new Healthy Homes were established, multiple villages advanced toward Open Defecation Free status, and new water points began serving hundreds of families while sustainability teams maintained systems serving more than 70,000 people. We are also responding to the humanitarian crisis along the Cambodia–Thailand border, providing emergency WASH support for displaced families while continuing long-term development work.
